

# DIY Bird Feeder

Upcycle your empty GoGo squeeZ® boxes and nourish our little winged friends this spring!

## WHAT YOU'LL NEED:

Bird Seed

Seed Butter

Hole Punch

Yarn

Scissors

Cut off the front and back panels of your box for the largest surface area to work with.

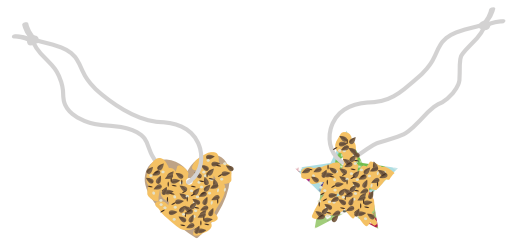

Flip your box panel over to reveal the blank cardboard side. Draw your favorite shape and then cut it out!

Punch a hole in each of your shapes, thread the yarn through and tie a knot.

Spread seed butter all over both sides of the shapes, and then press into a shallow container of bird seed to coat.

Hang up your custom bird feeders on the nearest tree, and keep an eye out for some hungry birdies!
